## Install Preparation for '07 - '18 JK Wrangler

Put on safety glasses. Open the hood of your Jeep®. Put the prop rod into the correct slot to hold hood open (FIG 1).

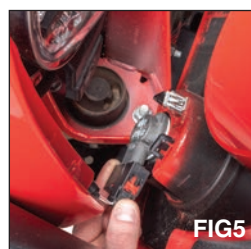

Locate the six plastic fasteners that secure the front grille to the upper body support (FIG 2).

Depending on your model year, pry up or unscrew the plastic fasteners (6 total) using a small screw driver. Early vehicles may feature phillips head screws, but most vehicles have a pry-up rivet as shown (FIG 2). First remove the center, then remove the body of each plastic retainer (FIG 3). Set rivets & screws aside in a safe place for re-installing the grille.

Next, Gently tilt the grille forward and then gently pop the lower portion of grille from its retaining clips. (FIG 4)

Disconnect the front turn signals by sliding the red locking tab backwards, depress the black latch and pull outward. (FIG 5)
